The Importance of Plan Books and Complete Plans

The building of a home is one of the most important events in life.

In selecting your home from our books you see exactly how it will appear after construction—a home designed for beauty as well as economy.

In using GARLINGHOUSE plans to build from, the chance of costly errors is reduced to a minimum.

To build a home without a plan or with only hastily drawn sketches is like your tailor making your suit without definite measurements. It can be done, but the process is generally costly and the result is usually unsatisfactory.

Our complete plans and specifications will save you many times their cost. All guesswork is eliminated and there is little chance of construction errors.

A wise man plans before he builds and our business is to help you and your customers plan homes.

Our books and plans are available to you at nominal costs. You cannot afford to build your home without a GARLINGHOUSE plan.

A set of our complete plans includes—

PLANS—The complete working plans consist of blue prints of all four elevations, basement and all floor plans and details showing built-in features and intricate parts, all drawn to a scale of not less than one-fourth inch to one foot. Also a plot plan in blank, to be filled in locally.

SPECIFICATIONS—The specifications explain every detail of the construction of the house from the excavation to the interior decorations.

LUMBER AND MILL LISTS—The lumber and mill lists consist of an itemized list of the lumber and mill materials needed to construct the building and stating where each item should be used.

ESTIMATED COSTS OF DESIGNS IN "AMERICA'S BEST LOW COST HOMES"

These figures are based on average labor and material costs in normal times. The rapidly changing economic conditions may cause construction costs to fluctuate, or the conditions in your local community may result in higher or lower costs.

Note—In order to arrive at an accurate estimate of the costs of the houses shown in this book, for your community, you should figure carefully one of the designs according to your local prices and note the percentage that your cost differs from our estimate, then apply the same percentage, high or low, to our estimated costs for other designs in which you are interested.

L. F. GARLINGHOUSE COMPANY, TOPEKA, KANSAS

Home

Day is done and twilight sheds its lovely radiance over all. The children wait to greet you, the wife eagerly waves her hand as you approach your home. A warm glow of satisfaction steals over you, a thrill of pride, as you draw near the home that shelters them and you. Every tree, shrub and flower has a charm for you, every stone and step a familiar place in your memory.

The roof lines and chimney silhouetted against the sky, the house snugly nestling on the lawn and in this soft light, its outlines softly diffused by the shrubbery, form a picture ever dear to you.

A warm dim glow from lights within, a cozy fireplace, a crackling log, a joyous welcome.

Home—happy home—your home.

In the happiness of the home lies the health and strength of the whole family, of the state and of the nation. The colonists came to America's shores to establish their homes, seeking the happiness to be found in them, hoping to discover here the free expression of conscience and purpose long denied them and apparently never to be realized for their children under the existing conditions; and succeeding generations have made our country the greatest home-owning nation on the globe.

Home is an inspiration to make for yourself an enviable place in the affairs of life. The owning of homes is the glory of the civilized community, for the rented house is not, never has been, and never can be, a real home.

Our organization is dedicated to the purpose of making it possible for each family—for your family—to have its own home; to help you realize that age-old longing to some day build the home of your dreams. By that purpose we justify our existence in the life of the community.
